

COMPUTER OPTIONS 7.0 Security

The privacy and security of you and your customers is one of our top priorities. For that reason, we've implemented a multitude of tools and processes to protect your meetings, personal data & privacy while using Computer Options 7.0.

Security Features

Computer Options 7.0 has the following security tools built into the platform:

How Computer Options Protects Your Meetings

- Meeting PINs by default
- Room/Meeting lock
- Room moderator(s)
- Ability to mute or kick-out participants turn off video/audio for participants
- Ability to have private meetings
- Ability to have private sidebar conversations during group meetings

How Computer Options Protects Your Data

- Proprietary packet encapsulation
- Secure authentication with option to sign in via Google
- Strong encryption
- Code obfuscation
- WebRTC and SRTP/SSL

How We're Protecting Your Privacy with Computer Options

We value the privacy of you and your customers, and remain committed to only using data we collect to manage the Computer Options platform. To support that commitment, we've instituted the following policies:

- No meeting information is shared with any third party without your consent (i.e. Google Calendar sync)
- No participant information is shared with any third party without your consent (i.e. Google Calendar sync)
